

Important Information For Cataract Surgery

Please Read This Page

- Please read all the material we have provided for your surgery, it will answer most questions that you may have and give important instructions for your surgery.
- Do not eat or drink after midnight the night before your surgery, if your surgery is in the afternoon you have instructions on the last time you can eat and what you can eat. If you do not follow these instructions the surgery center will cancel your surgery.
- You must have a responsible adult with you to drive you home after surgery, you will not be allowed to drive yourself or take public transportation. If you need help with transportation to and from the surgery center, please let our office know before hand, and we can help you arrange
- You do not need to stop your blood thinners or aspirin
- Do expect separate fees from the surgery center, anesthesiologist and Dr. Stewart
- Do not wear make-up or face creams the day of surgery
- Please read your eye drop instruction page and follow instructions

After Surgery

- Many patients notice the following after surgery:
 - Blurriness of vision
 - Scratchy or burning sensation
 - A change in color vision, flashes of light, and/or floaters
 - Sensitivity to light, halos around lights
 - Excessive tearing, watering of eye
- If you have some discomfort you may take Tylenol or ibuprofen
- If you have severe pain or sudden loss of vision call office immediately
